## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 19

Claim 19 is not clear (Art.6 PCT), as the enzyme inhibitor is not defined by actual, concrete technical features (such as its chemical structure) which would clearly and unambiguously characterize it, but by the method of identifying said enzyme inhibitor. Such definition might well encompass known compounds irrespective of their property of being enzyme inhibitors identified by the method of the present application, and does not allow to discriminate between novel and known compounds. Furthermore, the application discloses in a clear way no enzyme inhibitors identified with the method of the present application. For these reasons, no search has been carried out on claim 19.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), sovercome.

## INTERNATIONAL SEARCH REPORT

This International Search Report has not been established in respect of certain claims under Article 17(2)(s) for the following reasons:  1. Claims Nos.:	Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
because they relate to subject matter not required to be searched by this Authority, namely:  2. X Claims Nos.: 19 because they relate to parts of the international Application that do not comptly with the prescribed requirements to such an extent that no meaningful international Search can be carried out, specifically:  See FURTHER INFORMATION sheet PCT/ISA/210  3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).  Box III Observations where unity of invention is lacking (Continuation of Item 3 of first sheet)  This international Searching Authority found multiple inventions in this international application, as follows:  1. As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.  3. As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:  Permate as Particular additional search fees were timely paid by the applicant. Consequently, this international Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
